Volume Contents

Number 1. May

1 **Electron Spin Resonance Studies of Ionic Permeability Properties of Thylakoid Membranes of *Beta vulgaris* and *Avicennia germinans*—**Marilyn C. Ball*, Rolf J. Mehlhorn, Norman Terry, and Lester Packer

4 **Development of Three Copper Metalloenzymes in Clover Leaves—**Emmanuel Delhaize, Jack F. Loneragan*, and John Webb

8 **Role of Gibberellins in the Environmental Control of Stem Growth in *Thlaspi arvense* L.—**James D. Metzger

14 **Acifluorfen-Induced Isoflavonoids and Enzymes of Their Biosynthesis in Mature Soybean Leaves. Whole Leaf and Mesophyll Responses—**Eric G. Cosio, Gottfried Weissenböck, and Jerry W. McClure*

20 **A(1 → 3)-β-D-Glucan Isolated from *Zea* Shoot Cell Wall Preparations—**Yoji Kato and Donald J. Nevins*

25 **Influence of Culture Age and Spermidine Treatment on the Accumulation of Phenolic Compounds in Suspension Cultures—**Michael J. Muhitch and John S. Fletcher*

29 **Interaction between Senescence and Wounding in Oat Leaves—**G. Giridhar and Kenneth V. Thimann*

34 **A Supernodulation and Nitrate-Tolerant Symbiotic (*nts*) Soybean Mutant—**Bernard J. Carroll, David L. McNeil, and Peter M. Gresshoff*

41 **Energetics of Sucrose Transport into Photoplasts from Developing Soybean Cotyledons—**Willy Lin

46 **Photosynthesis Involvement in the Mechanism of Action of Diphenyl Ether Herbicides—**Michael P. Ensminger and F. Dan Hess*

51 **Metabolism of Abscisic Acid in Guard Cells of *Vicia faba* L. and *Commelina communis* L.—**David A. Grants*, Tuan-hua David Ho, Scott J. Uknes, John M. Cheeseman, and John S. Boyer

57 **Effect of Multiple Factor Source-Sink Manipulation on Nitrogen and Carbon Assimilation by Soybean—**Lee E. Schweitzer* and James E. Harper

61 **Leaf Nitrate Reductase, D-Ribulose-1,5-bisphosphate Carboxylase, and Root Nodule Development of Genetic Male-Sterile and Fertile Soybean Isolines—**Lee E. Schweitzer* and James E. Harper

66 ***In Situ* Measurement of Epidermal Cell Turgor, Leaf Water Potential, and Gas Exchange in *Tradescantia virginiana* L.—**Kenneth A. Shackel* and Enno Brinckmann

71 **O_2-Insensitive Photosynthesis in C_3 Plants, Its Occurence and a Possible Explanation—**Thomas D. Sharkey

76 **Vacuolar Localization of Wound-Induced Carboxypeptidase Inhibitor in Potato Leaves—**Heike Holländer-Czytko, Juli K. Andersen, and Clarence A. Ryan*

80 **Nitrate Reductases from Wild-Type and nr_1-Mutant Soybean (*Glycine max* [L.] Merr.) Leaves. I. Purification, Kinetics, and Physical Properties—**Luc Streit, Richard S. Nelson, and James E. Harper*

85 **Photosynthetic and Stomatal Responses of Spinach Leaves to Salt Stress—**W. John S. Downton*, W. James R. Grant, and Simon P. Robinson

89 **Separation and Quantitation of Polyamines in Plant Tissue by High Performance Liquid Chromatography of Their Dansyl Derivatives—**Mary A. Smith* and Peter J. Davies

92 **Role of Polyamines in Gibberellin-Induced Internode Growth in Peas—**Mary A. Smith*, Peter J. Davies, and James B. Reid

100 **Rapid Osmotic Adjustment by a Succulent Halophyte to Saline Shock—**Irving B. McNulty

104 **Proton Transport in Isolated Vacuoles from Corn Coleoptiles—**Suzanne Mandala and Lincoln Taiz*

110 **Acclimation Processes in the Light-Harvesting System of the Cyanobacterium *Anacystis nidulans* following a Light Shift from White to Red Light—**Anders Lönneborg*, Lisbet K. Lind, S. Roger Kalla, Petter Gustafsson, and Gunnar Öquist

115 **Iron Deficiency Decreases Suberization in Bean Roots through a Decrease in Suberin-Specific Peroxidase Activity—**Peter C. Sijmons*, P. E. Kolattukudy, and H. Frits Bienfait

121 **Proteolysis of Endogenous Substrates in Senescing Oat Leaves. I. Specific Degradation of Ribulose Bisphosphate Carboxylase—**Revital Shurtz-Swirski and Shimon Gepstein*

126 **Reduced Phenylalamine Ammonia-Lyase and Tyrosine Ammonia-Lyase Activities and Lignin Synthesis in Wheat Grown under Low Pressure Sodium Lamps—**Daniel Guerra*, Anne J. Anderson, and Frank B. Salisbury

131 **Carbohydrates Stimulate Ethylene Production in Tobacco Leaf Discs. I. Interaction with Auxin and the Relation to Auxin Metabolism—**Shimon Meir, Sonia Philosoph-Hadas, Ephraim Epstein, and Nehemia Aharoni*

139 **Carbohydrates Stimulate Ethylene Production in Tobacco Leaf Discs. II. Sites of Stimulation in the Ethylene Biosynthesis Pathway—**Sonia Philosoph-Hadas, Shimon Meir, and Nehemia Aharoni*

144 **Relation between Ion Accumulation of Salt-Sensitive and Isolated Stable Salt-Tolerant Cell Lines of *Citrus aurantium*—**Gozal Ben-Hayyim*, Pinchas Spiegel-Roy, and Hanna Neumann

149 **Sucrose Synthase of Soybean Nodules—**Matthew Morell and Les Copeland*

155 **Ribulose 1,5-Bisphosphate Carboxylase Synthesis during Heat Shock—**Elizabeth Vierling* and Joe L. Key

163 **Na^+/H^+ Antiport in Isolated Tonoplast Vesicles from Storage Tissue of *Beta vulgaris*—**Eduardo Blumwald* and Ronald J. Poole

168 **Antioxidant Levels in Germinating Soybean Seed Axes in Relation to Free Radical and Dehydration Tolerance—**Tissa Senaratna, Bryan D. McKersie*, and Robert H. Stinson

172 **Biochemical Characterization of Rice Glutelin—**Tuan-Nan Wen and Dawn S. Luthe*

178 **Analysis of Leaf Proteins by Two-Dimensional Gel Electrophoresis. Protease Action as Exemplified by Ribulose Bisphosphate Carboxylase/Oxygenase Degradation and Procedure to Avoid Proteolysis during Extraction—**Catherine Colas des Francs*, Hervé Thiellement, and Dominique de Vienne

183 **Water Transport in the Midrib Tissue of Maize Leaves. Direct Measurement of the Propagation of Changes in Cell Turgor across a Plant Tissue—**Mark E. Westgate and Ernst Steudle*

192 **Control of α-Amylase mRNA Accumulation by Gibberellic Acid and Calcium in Barley Aleurone Layers—**Jill Deikman* and Russell L. Jones

SHORT COMMUNICATIONS

199 Laternal Distribution of the Cytochrome b_6/f and Coupling Factor ATP Synthetase Complexes of Chloroplast Thylakoid Membranes—David R. Allred* and L. Andrew Staehelin

203 Effectiveness of Intermittent Light Treatments on Anthocyanin Synthesis in Dark-Grown and Light-Pretreated Seedlings—Alberto L. Mancinelli* and Isaac Rabino

207 Physiological and Metabolic Responses of Winter Wheat to Prolonged Freezing Stress—M. Keith Pomeroy*, Chris J. Andrews, K. P. Stanley, and Ji-Yin-Gao

Number 2. June

211 Cyclic and Noncyclic Photophosphorylation in Isolated Guard Cell Chloroplasts from *Vicia faba* L.—Kenichiro Shimazaki and Eduardo Zeiger*

215 Chloroplast-Diphenyl Ether Interactions II—S. H. Wettlaufer, Ruth Alscher*, and Christine Strick

221 L-Aspartate Transport into Pea Chloroplasts. Kinetic and Inhibitor Evidence for Multiple Transport Systems—Margaret Werner-Washburne and Kenneth Keegstra*

228 Enhanced Phytochrome Sensitivity and Its Reversal in *Amaranthus albus* Seeds—Regine Chadoeuf-Hannel and Ray B. Taylorson*

232 Evidence for an ATP-Dependent Proton Pump on the Golgi of Corn Coleoptiles—Alain Chanson and Lincoln Taiz*

241 Wheat Invertases, Characterization of Cell Wall-Bound and Soluble Forms—Hari B. Krishnan, Joan T. Blanchette, and Thomas W. Okita*

246 Physiological and Isotopic Aspects of Photosynthesis in *Peperomia*—Irwin P. Ting*, Loretta Bates, Leonel O'Reilly Sternberg, and Michael J. Deniro

250 Regulation of RNA Synthesis by DNA-Dependent RNA Polymerases and RNases during Cold Acclimation in Winter and Spring Wheat—Fathey Sarhan and Normand Chevrier*

256 Purification of d'Anjou Pear (*Pyrus communis* L.) Polyphenol Oxidase—Kimberly W. Wissemann* and Morris W. Montgomery

263 Effects of Morphactin and Other Auxin Transport Inhibitors on Soybean Senescence and Pod Development—Larry D. Noodén* and S. M. Noodén

267 A Membrane-Bound Protease in Microsomes of Spinach Callus—Shinobu Satoh* and Tadashi Fujii

272 Involvement of Ethylene in the Action of the Cotton Defoliant Thidiazuron—Jeffrey C. Suttle

277 Anaerobic Formation of D-Lactate and Partial Purification and Characterization of a Pyruvate Reductase from *Chlamydomonas reinhardtii*—Diane W. Husic and N. E. Tolbert*

285 Subcellular and Developmental Distribution of β-Cyanoalanine Synthase in Barley Leaves—Eve Syrkin Wurtele, Basil J. Nikolau, and Eric C. Conn.*

291 Sterospecificity of the Glucose Carrier in Sugar Beet Suspension Cells—Eliezer Zamski and Roger E. Wyse*

296 Chlorophyll-Proteins and Electron Transport during Iron Nutrition-Mediated Chloroplast Development—John N. Nishio, Javier Abadía, and Norman Terry*

300 Brassinosteroid-Induced Epinasty in Tomato Plants—Carl D. Schlagnhaufer and Richard N. Arteca*

304 Studies on *N*-Glycosylation by Elongating Tissues and Membranes from Pea Stems—Christian Pillonel and Gordon Maclachlan*

310 Differential Expression of Kunitz and Bowman-Birk Soybean Proteinase Inhibitors in Plant and Callus Tissue—Anna L. Tan-Wilson*, Philippe M. Hartl, Norman E. Delfel, and Karl A. Wilson

315 Metabolism of Oat Leaves during Senescence. VIII. The Role of L-Serine in Modifying Senescence—Bjarke Veierskov, Sergio O. Satler, and Kenneth V. Thimann*

320 Cyclic Variations in Nitrogen Uptake Rate in Soybean Plants—Leslie C. Tolley* and C. David Raper, Jr.

323 Correlation between Polyamines and Pyrrolidine Alkaloids in Developing Tobacco Callus—Antonio Fernández Tiburcio, Ravindar Kaur-Sawhney, Royal B. Ingersoll, and Arthur W. Galston*

327 Partial Purification of a Tonoplast ATPase from Corn Coleoptiles—Suzanne Mandala* and Lincoln Taiz

334 Role of Asparagine in the Photorespiratory Nitrogen Metabolism of Pea Leaves—Trung Chanh Ta, Kenneth W. Joy*, and Robert J. Ireland

338 Effects of Fungal Elicitor on Lignin Biosynthesis in Cell Suspension Cultures of Soybean—Edward E. Farmer

343 A Simple Method for Estimating Intactness of Spinach Leaf Protoplasts by Glycolate Oxidase Assay—Mikio Nishimura*, Roland Douce, and Takashi Akazawa

347 Cell Wall Yield Properties of Growing Tissue, Evaluation by *in Vivo* Stress Relaxation—Daniel J. Cosgrove

357 Superoxide Dismutase from *Lens esculenta*. Purification and Properties. Rodolfo Federico, Rosaria Medda, and Giovanni Floris*

359 Carbon Transport and Root Respiration of Split Root Systems of *Phaseolus vulgaris* Subjected to Short Term Localized Anoxia—Thomas E. Schumacher and Alvin J. M. Smucker*

365 Content of Adenine Nucleotides and Orthophosphate in Exporting and Importing Mature Maize Leaves—Walter Eschrich* and Joerg Fromm

370 Photocontrol of Peanut (*Arachis hypogaea* L.) Embryo and Ovule Development *in Vitro*—Laura K. Thompson, Meira Ziv, and Gerald F. Deitzer*

374 An Electron Transport System in Maize Roots for Reactions of Glutamate Synthase and Nitrite Reductase. Physiological and Immunochemical Properties of the Electron Carrier and Pyridine Nucleotide Reductase—Akira Suzuki, Ann Oaks*, Jean-Pierre Jacquot, Jean Vidal, and Pierre Gadal

379 Isolation and Partial Characterization of a New Lectin from Seeds of the Greater Celandine (*Chelidonium majus*)—Willy J. Peumans*, Marc De Ley, Hetty M. Stinissen, and Willem F. Broekaert

384 Lectin in Vegetative Tissues of Adult Barley Plants Grown under Field Conditions—Bruno Cammue, Hetty M. Stinissen, and Willy J. Peumans*

388 Phytochrome Control of Specific mRNA Levels in Developing Pea Buds. The Presence of Both Very Low Fluence and Low Fluence Responses—Lon S. Kaufman*, Winslow R. Briggs, and William F. Thompson

394 Accumulation of Heat Shock Proteins in Field-Grown Cotton—John J. Burke*, Jerry L. Hatfield, Robert R. Klein, and John E. Mullet

399 Photosynthetic Gene Expression and Cellular Differen-

tiation in Developing Maize Leaves—Belinda Martineau and William C. Taylor*

405 Transport of NAD^+ in Percoll-Purified Potato Tuber Mitochondria. Inhibition of NAD^+ Influx and Efflux by *N*-4-Azido-2-nitrophenyl-4-aminobutyryl-3′-NAD^+—Michel Neuberger*, David A. Day, and Roland Douce

411 Selection of Glyphosate-Tolerant Tobacco Calli and the Expression of this Tolerance in Regenerated Plants—Susan R. Singer* and Carl N. McDaniel

417 Identification of Gibberellins A_1, A_5, A_{29}, and A_{32} from Immature Seeds of Apricot (*Prunus armeniaca* L.)—Ruben Bottini, Guillermina De Bottini, Masaji Koshioka, Richard P. Pharis*, and Bryan G. Coombe

SHORT COMMUNICATIONS

420 Photosynthetic Activity in the Flower Buds of 'Valencia' Orange (*Citrus sinensis* [L.] Osbeck)—Joseph Cu V. Vu*, George Yelenosky, and Michael G. Bausher

424 Recognition of Superior Photosynthetic Efficiency in the Field Using the CO_2-Depletion Technique—Richard B. Peterson* and Israel Zelitch

427 Stable-Carbon Isotopic Composition of Maple Sap and Foliage—Steven W. Leavitt* and Austin Long

430 Trehalose as Cryoprotectant for the Freeze Preservation of Carrot and Tobacco Cells—Iqbal S. Bhandal, Randal M. Hauptmann, and Jack M. Widholm*

Number 3. July

433 Blue Light-Reducible Cytochromes in Membrane Fractions from *Neurospora crassa*—Charlotte E. Borgeson* and Barry J. Bowman

438 Tyrosine and Phenylalanine Ammonia Lyase Activities during Shoot Initiation in Tobacco Callus Cultures—Lynda D. Beaudoin-Eagan and Trevor A. Thorpe*

442 Differential Induction of Endoproteinases during Senescence of Attached and Detached Barley Leaves—Bruce L. Miller and Ray C. Huffaker*

447 Metabolism of Tryptophol in Higher and Lower Plants—Goran Laćan, Volker Magnus*, Šumski Šimaga, Sonja Iskrić, and Prudence J. Hall

455 Effect of Nitrate and Ammonium Nutrition of Nonnodulated *Phaseolus vulgaris* L. on Phosphoenolpyruvate Carboxylase and Pyruvate Kinase Activity—Patrick Schweizer and Karl H. Erismann*

459 Final Step of Phosphatidic Acid Synthesis in Peak Chloroplasts Occurs in the Inner Envelope Membrane—Jaen Andrews, John B. Ohlrogge, and Kenneth Keegstra*

466 Auxin and Fusicoccin Enhancement of β-Glucan Synthase in Peas. An Intracellular Enzyme Activity Apparently Modulated by Proton Extrusion—Peter M. Ray

473 Identification of Endogenous Gibberellins from *Salix pentandra*—John K. Davies, Einar Jensen, Olavi Junttila*, Laurent Rivier, and Alan Crozier

477 Amino Acid Sequence of a Novel Calmodulin from the Unicellular Alga *Chlamydomonas*—Thomas J. Lukas*, Michael E. Wiggins, and D. Martin Watterson

484 Effect of Low Temperature and Calcium on Survival and Membrane Properties of Isolated Winter Wheat Cells—M. Keith Pomeroy* and Chris J. Andrews

489 Translucent Tissue Defects in *Solanum tuberosum* L. I. Alterations in Amyloplast Membrane Integrity, Enzyme Activities, Sugars, and Starch Content—Joseph R. Sowokinos*, Edward C. Lulai, and Jane A. Knoper

495 H^+-ATPase Activity from Storage Tissue of *Beta vulgaris*. III. Modulation of ATPase Activity by Reaction Substrates and Products—Alan B. Bennett*, Sharman D. O'Neill, Marianne Eilmann, and Roger M. Spanswick

500 Sodium and Potassium Fluxes and Compartmentation in Roots of *Atriplex* and Oat—David Mills, Kenneth Robinson, and Thomas K. Hodges*

510 Localization of Cytokinin Biosynthetic Sites in Pea Plants and Carrot Roots—Chong-Maw Chen*, John R. Ertl, Scott M. Leisner, and Chi-Cheng Chang

514 Photosynthetic Development of Anaerobically Grown Rice (*Oryza sativa*) after Exposure to Air—Connie S. Bozarth and Robert A. Kennedy*

519 Seasonal Changes in the Photosynthetic Rate in Apple Trees. A Comparison between Fruiting and Nonfruiting Trees—JoAnn A. Fujii and Robert A. Kennedy*

525 Response to Drought Stress of Nitrogen Fixation (Acetylene Reduction) Rates by Field-Grown Soybeans—P. Randall Weisz, Robert F. Denison, and Thomas R. Sinclair*

531 Chloramphenicol Stimulation of Light Harvesting Chlorophyll Protein Complex Accumulation in a Chlorophyll *b* Deficient Wheat Mutant—Murray E. Duysen*, Thomas P. Freeman, Norman D. Williams, and Linda L. Huckle

537 Characterization of 4,4′-Diisothiocyano-2,2′-disulfonic Acid Stilbene Inhibition of 3-Phosphoglycerate-Dependent O_2 Evolution in Isolated Chloroplasts. Evidence for a Common Binding Site on C_4 Phosphate Translocator for 3-Phosphoglycerate, Phosphoenolpyruvate, and Inorganic Phosphate—Mary E. Rumpho and Gerald E. Edwards*

545 Oxygen Uptake and Photosynthesis of the Red Macroalga, *Chondrus crispus*, in Seawater. Effects of Oxygen Concentration—François Brechignac* and Marcel Andre

551 Continuous Measurements of the Free Dissolved CO_2 Concentration during Photosynthesis of Marine Plants. Evidence for HCO_3^- Use in *Chondrus crispus*—François Brechignac* and Marcel Andre

555 Quantitative Analysis of Pathways of Methionine Metabolism and Their Regulation in *Lemna*—John Giovanelli*, S. Harvey Mudd, and Anne H. Datko

561 Effect of Light Quality on the Composition, Function, and Structure of Photosynthetic Thylakoid Membranes of *Asplenium australasicum (Sm.) Hook*—Ta-Yan Leong, David J. Goodchild, and Jan M. Anderson*

568 Dicylohexylamine-Induced Shift of Biosynthesis from Spermidine to Spermine in Plant Protoplasts—Michael L. Greenberg* and Seymour S. Cohen

576 Changes in Nonstructural Carbohydrates in Different Parts of Soybean (*Glycine max* [L.] Merr.) Plants during a Light/Dark Cycle and in Extended Darkness—Phillip S. Kerr*, Thomas W. Rufty, Jr., and Steven C. Huber

582 Effects of Nutritional Stress on the Storage Proteins of Soybeans—Kenwyn R. Gayler, and Geoffrey E. Sykes

586 Immunological Evidence for the Presence of Ribulose Bisphosphate Carboxylase in Guard Cell Chloroplasts—Esther Zemel and Shimon Gepstein*

591 **Partial Purification and Properties of Phleinase Induced in Stem Base of Orchardgrass after Defoliation**—Shinrô Yamamoto* and Yôsuke Mino

596 **Free Space Iron Pools in Roots. Generation and Mobilization**—H. Frits Bienfait*, Wies van den Briel, and Nel T. Mesland-Mul

601 **Regulation of ADP-Glucose Pyrophosphorylase from *Chlorella vulgaris***—Yasunori Nakamura* and Masako Imamura

606 **Isolation of Photosystem I Complexes from Octyl Glucoside/Sodium Dodecyl Sulfate Solubilized Spinach Thylakoids. Characterization and Reconstitution into Liposomes**—Terri G. Dunahay* and L. Andrew Staehelin

614 **Nitrate Reductase from *Monoraphidium braunii*. Immunocytochemical Localization and Immunological Characterization**—Antonio Lopez-Ruiz, Jose Manuel Roldan, Jean Pierre Verbelen, and Jesus Diez*

619 **Reversibility of Photosynthetic Inhibition in Cotton after Long-Term Exposure to Elevated CO_2 Concentrations**—Thomas W. Sasek*, Evan H. DeLucia, and Boyd R. Strain

623 **Movement of Abscisic Acid into the Apoplast in Response to Water Stress in *Xanthium strumarium* L.**—Katrina Cornish and Jan A. D. Zeevaart*

627 **Effects of Polyethylene-Glycol-Induced Osmotic Stress on Transpiration and Photosynthesis in Pinto Bean Leaf Discs**—Robert L. Heath*, Robert T. Furbank, and David A. Walker

630 **Role of ABA in Maturation of Rapeseed Embryos**—Ruth R. Finkelstein*, Karen M. Tenbarge, Jane E. Shumway, and Martha L. Crouch

637 **Effects of Quantum Flux Density on Photosynthesis and Chloroplast Ultrastructure in Tissue-Cultured Plantlets and Seedlings of *Liquidambar styraciflua* L. towards Improved Acclimatization and Field Survival**—Ni Lee, Hazel Y. Wetzstein*, and Harry E. Sommer

SHORT COMMUNICATIONS

642 **Target Molecular Size of the Red Beet Plasma Membrane ATPase**—Donald P. Briskin*, W. Robert Thornley, and Joseph L. Roti-Roti

645 **Reassessment of an Apparent Hyperactive Form of Phosphofructokinase from Plants**—Nicholas J. Kruger and David T. Dennis*

649 **Linear Sucrose Transport in Protoplasts from Developing Soybean Cotyledons**—Willy Lin

652 **Pollen Sporoplasts: Dissolution of Pollen Walls**—Frank A. Loewus*, Bruce G. Baldi, Vincent R. Franceschi, Lawrence D. Meinert, and Jerry J. McCollum

655 **Sites of Gibberellin Biosynthesis in Pea Seedlings**—Ronald C. Coolbaugh

658 **Variant Cell Lines of *Haplopappus gracilis* with Disturbed Activities of Nitrate Reductase and Nitrite Reductase**—Luud J. W. Gilissen*, Atilio J. Barneix, Marjo Van Staveren, and Hans Breteler

661 **Pyruvate, Pi Dikinase in Bundle Sheath Strands as Well as in Mesophyll Cells in Maize Leaves**—Kazuko Aoyagi* and Hitoshi Nakamoto

Number 4. August

665 **Presence of Host-Plasma Membrane Type H^+-ATPase in the Membrane Envelope Enclosing the Bacteroids in Soybean Root Nodules**—Eduardo Blumwald*, Marc G. Fortin, Philip A. Rea, Desh Pal S. Verma, and Ronald J. Poole

673 **Metabolic Conversion of Amino Acids Loaded in the Vacuole of *Chara australis* Internodal Cells**—Katsuhiro Sakano* and Masashi Tazawa

678 **Regulation of Respiration in the Leaves and Roots of Two *Lolium perenne* Populations with Contrasting Mature Leaf Respiration Rates and Crop Yields**—David A. Day*, Oene C. De Vos, David Wilson, and Hans Lambers

684 **Uptake of Glutamine by the Scutellum of Germinating Barley Grain**—Tuomas Sopanen* and Eila Väisänen

690 **Behavior of Lipoxygenase during Establishment Senescence, and Rejuvenation of Soybean Cotyledons**—T. Kaye Peterman and James N. Siedow*

696 **Protein and RNA Synthesizing Activities during Sexual Process of Heterothallic *Closterium***—Atsushi Kato and Kimiko Sasaki*

700 **Regulation of Potato Tuber Protein Accumulation by Gibberellic Acid**—David J. Hannapel, J. Creighton Miller, Jr., and William D. Park*

704 **Abnormal Processing of the Modified Oligosaccharide Side Chains of Phytohemagglutinin in the Presence of Swainsonine and Deoxynojirimycin**—Maarten J. Chrispeels* and A. Vitale

710 **Photoperiodic Regulation of Photosynthate Partitioning in Leaves of *Digitaria decumbens* Stent.**—Steven J. Britz*, Wayne E. Hungerford, and David R. Lee

715 **Proteins in Intercellular Washing Fluid from Noninoculated and Rust-Affected Leaves of Wheat and Barley**—David H. Holden and Roland Rohringer*

724 **Photoinhibition of Photosynthesis in Broken Chloroplasts as a Function of Electron Transfer Rates during Light Treatment**—Gabriel Cornic and Myroslawa Miginiac-Maslow*

730 **Isolation and Partial Purification of Prophenoloxidase from *Daucus carota* L. Cell Cultures**—Kenneth Söderhäll*, Irene Carlberg, and Tage Eriksson

734 **A Technique for Collection of Exudate from Pea Seedlings**—Susan D. Hanson and Jerry D. Cohen*

739 **Effect of N Source on the Steady State Growth and N Assimilation of P-limited *Anabaena flos-aquae***—David B. Layzell, David H. Turpin*, and Ivor R. Elrifi

746 **Modeling the C Economy of *Anabaena flos-aquae*. Estimates of Establishment, Maintenance, and Active Costs Associated with Growth on NH_3, NO_3^-, and N_2**—David H. Turpin*, David B. Layzell*, and Ivor R. Elrifi

753 **Diurnal Changes in Allocation of Newly Fixed Carbon in Exporting Sugar Beet Leaves**—Bernadette R. Fondy* and Donald R. Geiger

758 **Partial Purification and Characterization of D-Ribose-5-phosphate Reductase from *Adonis vernalis* L. Leaves**—Fayek B. Negm* and Gary C. Marlow

762 **Studies on Genetic Male-Sterile Soybeans. IV. Effect of Male Sterility and Source of Nitrogen Nutrition on Accumulation, Partitioning, and Transport of Nitrogen**—Daniel W. Israel*, Joseph W. Burton, and Richard F. Wilson

768 **Intracellular pH Regulation during NO_3^- Assimilation in Shoot and Roots of *Ricinus communis***—Marinus L. van Beusichem*, Robert Baas, Ernest A. Kirkby, and Jacob A. Nelemans

774 **Transport and Partitioning of CO_2 Fixed by Root Nodules of Ureide and Amide Producing Legumes**—

Carroll P. Vance*, Kristin L. M. Boylan, Carl A. Maxwell, Gary H. Heichel, and Leland L. Hardman

779 **Nitrogen Metabolism in Senescent Flag Leaves of Wheat (*Triticum aestivum L.*) in the Light**—Michael G. Berger, K. C. Woo*, Suan-Chin Wong, and Heinrich P. Fock

784 ***S*-Adenosylmethionine Decarboxylase and Spermidine Synthase from Chinese Cabbage**—Banri Yamanoha and Seymour S. Cohen*

791 **Flavan-3-ol Biosynthesis. The Conversion of (+)-Dihydromyricetin to Its Flavan-3,4-Diol (Leucodelphinidin) and to (+)-Gallocatechin by Reductases Extracted from Tissue Cultures of *Ginkgo biloba* and *Pseudotsuga menziesii***—Helen A. Stafford* and Hope H. Lester

795 **Use of N^2-Bromoacetyl-L-ornithine to Study L-Ornithine and L-Arginine Biosynthesis in Soybean (*Glycine max* L.) Cell Cultures**—Peter D. Shargool* and Jinesh C. Jain

799 **Photosynthetic and Respiratory Rates of Two Psychrophilic Diatoms**—Chase Van Baalen

803 **Effects of Light Intensity and Oxidized Nitrogen Sources on Hydrogen Production by Chlamydomonas reinhardii**—Pedro J. Aparicio*, María P. Azuara, Antonio Ballesteros, and Victor M. Fernández

807 **Synthesis and Uptake of Cytoplasmically Synthesized Pyruvate, Pi Dikinase Polypeptide by Chloroplasts**—Kazuko Aoyagi and James A. Bassham*

812 **Homology among 3S and 7S Globulins from Cereals and Pea**—Laurian S. Robert, Khosrow Adeli, and Illimar Altosaar*

817 **Determination of Intracellular Osmotic Volume and Sodium Concentration in *Dunaliella***—Adriana Katz and Mordhay Avron*

821 **Leaf Conductance in Relation to Rate of CO_2 Assimilation. I. Influence of Nitrogen Nutrition, Phosphorus Nutrition, Photon Flux Density, and Ambient Partial Pressure of CO_2 during Ontogeny**—Suan-Chin Wong*, Ian R. Cowan, and Graham D. Farquhar

826 **Leaf Conductance in Relation to Rate of CO_2 Assimilation. II. Effects of Short-Term Exposures to Different Photon Flux Densities**—Suan-Chin Wong*, Ian R. Cowan, and Graham D. Farquhar

830 **Leaf Conductance in Relation to Rate of CO_2 Assimilation. III. Influences of Water Stress and Photoinhibition**—Suan-Chin Wong*, Ian R. Cowan, and Graham D. Farquhar

835 **UDP-GlcNAc:Glycoprotein GlcNAc-Transferase is Located in the Golgi Apparatus of Developing Bean Cotyledons**—Maarten J. Chrispeels

839 **Binding of a Phosphorylated Inhibitor to Ribulose Bisphosphate Carboxylase/Oxygenase during the Night**—Jerome C. Servaites

844 **Nature and Amount of Auxin in Algae**—William P. Jacobs*, Kathy Falkenstein, and Robert H. Hamilton

849 **Partial Purification and Characterization of Granule-Bound Starch Synthases from Normal and *Waxy* Maize**—Fraser D. Macdonald and Jack Preiss*

853 **Analysis of Photosynthetic Antenna Function in a Mutant *Arabidopsis thaliana* (L.) Lacking *trans*-Hexadecenoic Acid**—Peter McCourt, John Browse, Jan Watson, Charles J. Arntzen, and Chris R. Somerville*

859 **Changes in Levels of Intermediates of the C_4 Cycle and Reductive Pentose Phosphate Pathway during Induction of Photosynthesis in Maize Leaves**—Hideaki Usuda

865 **Membrane Transport in Isolated Vesicles from Sugarbeet Taproot. I. Isolation and Characterization of Energy-Dependent H^+-Transporting Vesicles**—Donald P. Briskin*, W. Robert Thornley, and Roger E. Wyse

871 **Membrane Transport in Isolated Vesicles from Sugarbeet Taproot. II. Evidence for a Sucrose/H^+-Antiport**—Donald P. Briskin*, W. Robert Thornley, and Roger E. Wyse

876 **Reprogramming of Protein Synthesis from a Development to a Germinative Mode Induced by Desiccation of the Axes of *Phaseolus vulgaris***—Santosh Misra and J. Derek-Bewley*

883 **Effect of Leaf Detachment on Chlorophyll Fluorescence during Chilling Experiments**—Catherine Potvin

SHORT COMMUNICATIONS

887 **High Temperature-Induced Thermotolerance in Pollen Tubes of *Tradescantia* and Heat-Shock Proteins**—Chong-Ming Xiao and Joseph P. Mascarenhas*

891 **Decrease in Three Messenger RNA Species Coding for Chloroplast Proteins in Leaves of Barley Infected with *Erisiphe graminis* f. sp. *hordei***—Colleen M. Higgins, John M. Manners, and Kenneth J. Scott*

895 **Degradation of β-Conglycinin in Early Stages of Soybean Embryogenesis**—Donna M. Shuttuck-Eidens and Roger N. Beachy*

899 **Identification of Ten Gibberellins from Sporophytes of the Tree Fern, *Cyathea australis***—Hisakazu Yamane, Isomaro Yamaguchi, Masatomo Kobayashi, Masahiro Takahashi, Yoshio Sato, Nobutaka Takahashi, Kunio Iwatsuki, Bernard O. Phinney*, Clive R. Spray, Paul Gaskin, and Jake MacMillan

904 **Phytoluminographic Detection of Dynamic Variations in Leaf Gaseous Conductivity**—James L. Ellenson

909 **Corrections**

iii **Volume Contents**

viii **Volume Author Index**

xi **Volume Subject Index**
